I want to wait until my GWT app is closed. I want to do this to ensure that all callback handlers are unregistered before the app is closed. Here is my applet: public void init(){ this.addDomHandler(new CancelHandler(), "Cancel"); if(!this.started){ this.started = true; this.run(); } } My GWT app is started by calling final Shell shell = this.getShell(); shell.display().asyncExec(new Runnable() { public void run() { shell.open(); } 82157476af
