Do it now It will take a while but it will wait Perfect now just get it to run its been on the welcome screen for 5 minutes then it suddenly starts but the picture is not exactly in the size of my monitor.. I installed the game fine following all of the instructions but when i got to play and it starts i get an error message about there being an exception raised and unhandled page.. Now it will ask you for your license code Enter it Now it will ask you to install all three patches. Now it will ask you for the license code Enter it Now it will ask you to install all three patches.
